Maple Lane Traffic Signal Moves Closer to Reality

Installation of a traffic signal at the intersection of Highway 38 and Maple Lane in Big Bear moved two steps closer to reality Tuesday, when the Board of Supervisors approved two actions.

The first item approved is a cooperative agreement with the California Department of Transportation (CalTrans) to jointly fund the \$1,632,500 cost to install the traffic signal with the County's share estimated to be \$960,500 and the State's share \$672,000.

The second item approved was the plans and specifications for the signal installation project and authorizing the Director of Public Works to advertise for bids to complete the project. Once bids are received, the item will return to the Board to award the contract for construction.

"This is an important project for the Big Bear area that will improve public safety and traffic circulation. I am pleased that it is moving forward," said Third District Supervisor Dennis Hansberger.
